

QUIPU AS31

Museum identification: No. F/851 (Peabody Museum, Harvard University)

Main cord: color DB-LB-G-W

\$ 6.0 cm: pendant cord (1), then space of 3.5 cm.

9.5 cm: group of 8 pendant cords (2-9), then space of 2.5 cm.

12.0 cm: group of 8 pendant cords (10-17), then space of 15.0 cm.

29.0 cm: group of 8 pendant cords (18-25), then space of 1.5 cm.

32.5 cm: group of 8 pendant cords (26-33), then space of 0.5 cm.

35.0 cm: group of 7 pendant cords (34-40), then space of 1.0 cm.

38.0 cm: group of 2 pendant cords (41-42), then space of 2.0 cm.

40.5 cm: group of 8 pendant cords (43-50), then space of 5.0 cm.

47.5 cm: group of 4 pendant cords (51-54), then space of 170 cm.

218.0 cm: end ¢

Observations

1. This quipu can be viewed as six groups of 8 pendants (assuming that it is the 4th pendant in the 5th group that is not present) with 3 additional pendants (1, 41, 42) and a final group of 4 blank pendants (51-54). Referring to them as groups 1, 2, 3, 4, 5, 6, the following regularities are noted:

- A) All pendants in a group are the same color. Group 5 is LB/W and the rest are W.
- B) For all 6 groups, there are subsidiaries on pendants 2 and 5.
- C) For all 6 groups, the values of pendants 2 and 5 are between 77 and 158 while the values of the other six pendants are each less than 59. When subsidiary values are added to pendant values, the values of positions

2 and 5 are increased so that they are between 120 and 163(+?), but the values of the other 6 positions remain less than 59.

D) Alternate groups show similarities:

For groups 1, 3, 5: $P_5 > P_2 > P_4 \geq P_3 >$ {
 P_7
 P_8 ; $P_1 = 8$

while for groups 2, 4, 6: $P_2 > P_5 > P_3 > P_4$; $P_4 = 16$

For groups 3, 5: $P_1 = 8$; $P_2 = 77$; $P_5 = 83$

while for groups 4, 6: $P_4 = 16$; $P_5 = 90$; $P_6 = 4$.

2. There seem to be an excessive number of values that are multiples of 8 or 11. Of forty-four unbroken, nonzero pendant values, 12 are multiples of 8, and 8 are multiples of 11. When subsidiary values and pendant values are considered, of sixty-five values, fifteen are multiples of 8 and twelve are multiples of 11. The multiples of 8 that appear are 8, 16, 24, 32, 40, and 120. The multiples of 11 are 11, 33, 44, 55, 77, and 132.
